

**Broan Light Commercial ENERGY STAR® Ventilation Fans** may be used as a single-point solution, or configured with multiple ventilation drop points in an inline solution.

# **ENERGY STAR®** Ventilation Fans.

We take 25,000 breaths every day. Many of those at home, but perhaps even more at work, while shopping, in the grocery store and countless businesses we frequent every day. That's why Broan-NuTone is committed to improving indoor air quality in every commercial and light industrial space with powerful and energy-efficient exhaust ventilation solutions. Rely on Broan Light Commercial Ventilation Fans to deliver code-compliant and ENERGY STAR® certified indoor air quality solutions.

# Choose the right ENERGY STAR® commercial ventilation solution confidently.

Many mechanical ventilation requirements and energy codes are confusing, which can make specifying the right product challenging. We developed a selection methodology and product suite to simplify everything.

**Fan Motor** 

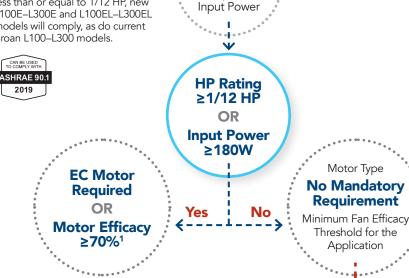

Capacity

Nameplate HP

Understanding key codes and certifications. Mechanical engineers regularly design to and take into consideration ASHRAE 90.1, IECC-C and IMC requirements.

### **ASHRAE 90.1 (American Society** of Heating, Refrigerating and **Air-Conditioning Engineers)**

Governing energy standard for mid- to high-rise commercial, or industrial buildings. With motors less than or equal to 1/12 HP, new L100E-L300E and L100EL-L300EL models will comply, as do current Broan L100-L300 models.

### **AMCA Certified** (Air Movement and Control Association)

Air and sound certification required to comply with IMC code.

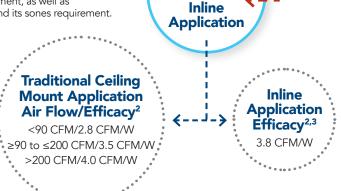

### IMC (International Mechanical Code)

Minimum regulations for the safety of heating, ventilation, and air conditioning systems.

## **IECC-C (International Energy** Conservation Code—Commercial)

Primary energy code for commercial applications that meet the same CFM/watt requirements as the ENERGY STAR® standard. New Broan L100E-L300E and L100EL-L300EL models meet this CFM/watt requirement, as well as ENERGY STAR® and its sones requirement.

Ceiling Mount

OR

### **HVI Certified**

Tested and certified to specific industry standards. Required to be ENÉRGY STAR® certified.

# **ENERGY STAR® Certified**

The trusted, EPA symbol for energy efficiency with the same CFM/watt requirements as the IECC-C standard.

<sup>3</sup> Inline application without filtration that could affect airflow

# cULus Listed

Tested to Canadian and US standards by Underwriters' Laboratories.
