

Make any ventilation fan a humidity-sensing fan

with the Sensaire™ Humidity Sensing wall control¹.

Precisely control the ventilation in your bathroom or indoor environment to mitigate mold and moisture issues from improper use of exhaust fans. Mirrors fogging up? Use the Auto Sense Mode to turn the fan on automatically. As humidity levels decrease the fan shuts off automatically. Use the Duty Cycle Mode to meet ASHRAE 62.2 requirements for continuous ventilation. Or use the Humidistat Mode to meet California Title 24 requirements. Make Sensaire™ your first choice in smart ventilation.

Sensaire™ Humidity Sensing Wall Control Features

- Up to 4X faster humidity sensing
- Reduces mold and improves indoor air quality
- Installs fast with traditional 3-wire installation—no special connections
- Fits in a single gang box—no caulking or special tools needed
- LED fan “on” indicator
- Manual On/Off operation mode
- Rated 120V, 9 amp (fan only or fan/light combo)

Three modes for easy programming

- Auto Sense Mode with Sensaire™ technology
- Duty Cycle (min/hour) Mode (meets ASHRAE 62.2)
- RH% Humidistat Mode (complies with CA Title 24)
- User adjustable automatic shutoff timer (in any mode)

Available in White (82W) or Light Almond (82A)

- Fits any décor style, faceplate not included
- 82W and 82A are packed in a white carton
- P82W is packed as a 4-pack

¹Patent pending.
