Line Voltage Doorbell Kits

No need for an external transformer with this innovative builder kit that significantly cuts installation time to under 5 minutes. The built-in transformer allows the chime to connect directly to 120V line voltage. A variety of pushbutton options, including a wireless, battery-free option, make this the most versatile doorbell kit on the market. The Line Voltage Doorbell Kit comes pre-loaded with the front and rear tones with wired pushbuttons and 8 different tones when paired with wireless pushbuttons. The electronic chime tones offer clean, loud sound quality that can be recognized from anywhere in the home. Choose from 5 kits with chime and pushbuttons included.

Installation takes under 5 minutes with chime connection directly to 120V – no external transformer required!

Wireless or wired pushbutton compatibility provides installation flexibility.
